

APPENDIX: Key word index - this issue

- 5-HT3 receptors **43**
acute coronary syndrome **13**
adhesion molecules **26**
adipocyte fatty acid-binding protein **6, 26**
adipokines **93**
angiographic score **55**
ANGPTL4 **13**
animal models **43**
ankle brachial index **32**
atherogenic dyslipidemia **87**
atherosclerosis **13, 93**
blood lipids **55**
body adiposity index **78**
body mass index **78**
carbonyl protein **50**
cardiovascular diseases **102**
cardiovascular risk factors **32**
cardiovascular system **17**
cell adhesion molecules **73**
cholesterol efflux **38**
circulating endothelial microparticles **68**
coenzyme Q10 **98**
common carp **60**
coronary artery disease **55**
coronary heart disease **17**
delta-6-desaturase **83**
depressive disorder **83**
DHA **60**
diabetes mellitus **73**
differentiation degree **93**
dyslipidemia **26, 43**
early medical intervention **102**
efficacy **22**
endothelial dysfunction **68**
energy intake **3**
EPA **60**
epicardial adipocytes **93**
exercise **50**
fatty acids **83**
fenofibrate **73**
finishing feeding **60**
fish oil **60**
free fatty acids **6**
gene expression **93**
gene-gender interaction **22**
glucose tolerance **43**
heart failure **68**
heat shock proteins **60, 50**
high sensitivity C-reactive protein **50**
hip **78**
HNF1 α **13**
hormone replacement therapy **17**
inflammation **50, 93**
insulin resistance **6, 83**
interleukin 6 **50**
ischemic heart disease **50**
leukocytes **73**
life style **3**
lipopolysaccharide receptor **73**
lipoprotein (a) **55**
lipoproteins **38, 55**
macrophages **38**
Mannan binding lectin **50**
mixed hyperlipidemia **73**
monocyte chemoattractant protein-1 **50**
muscle weakness **98**
n-3 PUFA **87**
nicotine dependence **102**
non-pulsatile flow **68**
nutrition **3**
obesity **6**
ondansetron **43**
oxidized glutathione **50**
pain **98**
peripheral arterial disease **32**
pharmacogenetics **43**
plasminogen activator inhibitor-1 **26**
polymorphism **13, 22**
prevalence **32**
residual cardiovascular risk **87**
reverse cholesterol transport **38**
risk factors **102**
simvastatin **73**
SLCO1B1 **22**
smoking **3, 38**
smoking cessation **102**
statin **22, 98**
statin-myopathy **98**
statin therapy **55**
tailored fish products **60**
tissue-plasminogen activator **26**
transforming growth factor β 1 **50**
type 1 diabetes mellitus **6**
ventricle assist device **68**
von Willebrand factor **26**
WHR **78**
window of opportunity **17**
